FATADS - MADE BY PROFESSIONALS FOR PROFESSIONALS.

We're people who had great experience in other ad networks and known to all advertisers needs. We provide a unique Conversion Booster feature, an AI-learning algorithm that automatically works on each campaign. Conversion Booster constantly analyzes your conversions and campaign performance for turning off/on new lists of sources to minimize your costs and maximize conversions.

This feature works specifically on your targetings, like GEO, device, OS, etc. And therefore it turns on best performing sources designed to your specific needs.

The screenshot displays the FATADS website interface. On the left is a vertical navigation menu with icons for Ad Formats, Traffic Insights, Bundles, Plans, Verticals, Terms, Materials, and FAQ. The main content area features the FATADS logo, a 'Log In' and 'Sign Up' button, and the headline 'MIND-BLOWING FLOWS' and 'JUICY FAT RETURNS'. Below this is a paragraph of text and a 'Try fat piece of ads!' button. At the bottom, a statistics table is shown.
